Your Business ID Breach Emergency Recovery Team

“... targeting a business can bring in ten times or more (than targeting a consumer), so from a criminal’s viewpoint, it’s far more cost effective to target a business rather than a consumer.”

Robert Morgester,
California Deputy
Attorney General

To protect businesses from the risks resulting from a business breach, ID Medic's has three business plans available - the Small Business and Small Business Plus Plans for businesses with less than 100 employees or, \$6 million in revenue and are non-public - and the Large Business Plan for any business in America.

All of our business plans support new federal Red Flags Rule and HIPAA requirements, and require no reporting of client/customer names or non-public information.
